Global Product Development Leader - Expert in AI Transformation, Strategic Project Management, and Regulatory Compliance in Financial Services.

Seasoned techno-functional professional with 18 years of expertise in Product Ownership, Management, Development, and Business Analysis. Proven success in steering end-to-end project lifecycles, collaborating with stakeholders, and driving AI transformations. Exceptional skills in translating business user needs into requirements, managing Agile methodologies, and ensuring successful project delivery with a focus on quality, productivity, and innovation.

- **Global Product Development Leadership:** Led successful projects in banking, loan & asset management, corporate treasury and more, for over 18 years ensuring client satisfaction.
- **AI Transformation Leadership:** Currently at the forefront of driving AI transformation, leading a taskforce focused on integrating AI across technical and business functions. Instrumental in adopting cutting-edge AI technologies for enhanced efficiency, decision support, and innovative product development.
- **Strategic Project Management:** Adept at steering committees, contributing to project road-mapping, and managing projects across the SDLC and Product Cycle.
- **Regulatory Compliance and Representation:** Served as a Single Point of Contact, managing and representing key metrics for regulatory bodies in senior management and cabinet meetings.
- **Innovation Leadership:** Proficient in leading AI prototyping for Chatbots (NLP) and Forecasting modules, showcasing commitment to innovation.
- **Market Analysis and Decision Support:** Skilled in conducting thorough market research, product/feature-gap analysis, and facilitating workshops for informed decision-making.

Core Competencies

Global Product Development Leadership ● Strategic Project Management ● Regulatory Compliance ● Stakeholder Engagement ● Artificial Intelligence ● Machine Learning ● Innovation Leadership ● Market Analysis ● Decision Support ● Techno-Functional Expertise ● End-to-End Responsibilities ● Product Road-Mapping ● AI Transformation Leadership ● Collaborative Leadership ● Agile Scrum ● LeSS Development ● Azure DevOps ● Business Analysis ● Product Ownership ● Cross-Functional Collaboration ● Project Planning and Execution ● Documentation and Testing ● Programming ● Team Leadership ● Product Conceptualization ● Risk Management ● Financial Services Expertise ● Product Management

Technical Skills

Programming Languages: PROGRESS 4GL (ABL), ADM2 and OEA, Python, Tableau, Power BI, Excel VBA, Javascript, SQL, Kendo UI, Angular, UNIX, .NET, SAS, Java, C, and C++

Tools: MS Visio, Jupyter Notebook, TensorFlow, PyTorch, NumPy, Basic knowledge of UML

Applications: Azure DevOps, MS Office Suite, DevStudio, Colab, Doc2Help

Experience Details

July'12 – Present: CGI India | Global Delivery Manager and Product Owner

Growth Path: Director Consulting (2024 – Present) | Manager Consulting (2017-2024) | Lead BA (2014-2017) | Sr.BA and Developer (2012-2014)

- **Global Product Development Leadership:** Successfully manage the global delivery of TWIN8 and TWIN360, demonstrating adept coordination in international projects. Lead the 'from scratch' development of TWIN360, overseeing the entire lifecycle from ideation to delivery.
- **Strategic Project Management:** Play a key role in steering committees, contributing to project road-mapping and strategic planning. Manage projects spanning the Software Development Life Cycle (SDLC) and Product Cycle.
- **Product Ownership and Documentation Expertise:** Act as the Product Owner for TWIN360, showcasing ownership from conception to market release. Solely responsible for creating the 'User Guide' for TWIN using Doc2Help, Robohelp, and Microsoft Word.
- **Market Analysis and Decision Support:** Conduct thorough market research and product/feature-gap analysis, informing strategic decision-making. Facilitate workshops based on insights, contributing to actionable strategies.
- **Regulatory Compliance and Representation:** Serve as the Single Point of Contact (SPOC) for TWIN with regulatory bodies like ESMA/EMIR and TRs such as DTCC and Regis. Manage and represent TWIN's metrics and Key Performance Indicators (KPIs) in senior management and cabinet meetings.
- **Issue Analysis and Support Collaboration:** Analyze support issues and provide crucial information to the development team for efficient resolution.

- **Innovation and Prototyping Leadership:** Lead the prototyping of AI blocks for Chatbots (NLP) and Forecasting modules in TWIN, showcasing commitment to innovation.

Significant Highlights

- Successfully led the end-to-end development and delivery of TWIN360, a new product in the Corporate Treasury domain, resulting in 4 live customers, 6 in migration, and a pipeline of 87; earned promotion to the title of Director at CGI.
- Led successful completion of TWIN's EMIR - REFIT projects, achieving compliance and enabling regulatory reporting for EU customers, while implementing schema changes that resulted in significant cost savings, **approximately 75K EUR per customer**.
- Revamped TWIN8 user documentation, creating an acclaimed online guide widely utilized by customers, product support, and development teams, while also contributing to BRD, FRD, POC, and project bidding.

Sep 2008 to Jun 2011: SunGard (STS), India | Senior Engineer- Product Development

- Led successful integration of the Swaps module at InTrader, **expanding customer base by 11**, earning promotion to Senior Engineer, and securing consecutive performance awards for excellence in product development and business analysis.
- Led product development initiatives, utilizing strong programming skills to contribute to the creation and enhancement of software solutions.
- Engaged in effective business analysis by collaborating with users, gathering requirements, and translating them into actionable development plans, ensuring alignment with organizational objectives.
- Conducted comprehensive unit testing to guarantee the reliability and functionality of software products, identifying and resolving issues promptly.
- Played a key role in database administration and server maintenance, ensuring the seamless operation of essential infrastructure elements vital to the success of the organization.
- Provided dedicated product support and conducted training sessions for the team, fostering a collaborative and knowledgeable work environment that enhanced overall productivity.

Jan 2006 to Sep 2008: Ocwen Financial Solutions Pvt. Ltd (Now Altisource) | Software Engineer

- Successfully led MHFA migration to REALServicing 7.2, enhancing functionalities and ensuring client satisfaction. Recognized as Best Employee in 2006, promoted to Software Engineer for contributions in product development, customer interaction, bug-fixing, and enhancements.
- Demonstrated proficiency in diverse programming languages, actively contributing to the development of robust software solutions.
- Led and managed the entire product development lifecycle, ensuring the successful delivery of high-quality software products.
- Applied detailed debugging, implemented effective data fixing strategies, and engaged in frequent client interactions for successful project execution.

Academics

- B.Tech (Electronics and Communication) | NSS College of Engineering, Palakkad | 2005
- PGP (Full-Time MBA-EPGDBM) | NMiMS | 2012

Certifications

- SAFe POPM (Product Owner / Product Manager) Certified from Scaled Agile.
- CBAP Certified Professional from IIBA (License is not renewed).
- Certified 35 hours of training for the PMP certification.
- Six Sigma Green belt certification.
- Certificate Programme in Artificial Intelligence for Managers
